

**MATHEMATICS PROGRAMME FOR GRADE 12 LEARNERS FROM 4 – 22 MAY 2020**

**TOPIC: DIFFERENTIAL CALCULUS**

**MARKS IN EXAMINATION PAPER: 35 +/- 3 MARKS IN PAPER 1**

**MAIN RESOURCE(S) SUGGESTED: MIND THE GAP STUDY GUIDE AND EC BOOKLETS/ 'YES I CAN' GUIDES**

**ADDITIONAL RESOURCES: ANY APPROVED TEXTBOOK AND/OR STUDY GUIDE**

**MEDIA:**

- SELECT ED EC COMMUNITY RADIO ST AT IONS AT 18H00 FROM 30 MARCH.
- UMHLOBO WENENE FM AT 10H30 ON 20 AND 27 MAY 2020.
- VLC EC VIRTUAL LESSONS.
- SABC TV, OVHD AND DSTVCHANNEL 319.
- ECDOE WEBSITE.
- DBE WEBSITE.

**USE OF MIND THE GAP STUDY GUIDE AND EC BOOKLETS/ 'YES I CAN' GUIDES**

**WEEK 1: 4 – 8 MAY 2020**

**USE MIND THE GAP (PAGE 123 TO 144) AS FOLLOWS:**

- Read and follow the explanation about the topic/ concept.
- Follow and practice Examples indicated 'E.G'.
- Then do Activities without looking at the solutions first.
- Then check your solutions against solutions provided.
- Then do corrections.
- Double or triple check if you are able to do Activities on your own without looking at the solutions until you master the concept(s).

DATE	EXAMPLES	ACTIVITY	PAGE(S)
4/05	Read 7.1 on page 123	1	123
5/05	1 and 2 on page 125 and 127	2	127
6/05	3, 4 & 5 on page 128	3	129
7/05	6	4	130
8/05	Revise FIRST PRINCIPLES and Using Rules of Differentiation	Use 'YES I CAN' BOOKLET OR Previous Question Paper.	

## WEEK 2: 11 – 15 MAY 2020

- Read and follow the explanation about the topic/ concept.
- Follow and practice Examples indicated 'E.G'.
- Then do Activities without looking at the solutions first.
- Then check your solutions against solutions provided.
- Then do corrections if you did not get the correct answers.
- Double or triple check if you are able to do Activities on your own without looking at the solutions until you master the concept(s).

DATE	EXAMPLES	ACTIVITY	PAGE(S)
11/05	7	Follow E.G 8 and do it on your own as an activity	132 – 134
12/05	9	Follow E.G 10 and do it on your own as an activity	135 – 137
13/05	Revise Previous examples	5 number 1	137
14/05	Revise Previous examples	5 number 2	132 – 138
15/05	Revise Sketching Cubic Functions and Using Rules of Differentiation	Use 'YES I CAN' BOOKLET OR Previous Question Paper.	

## WEEK 3: 18 – 22 MAY 2020

DATE	EXAMPLES	ACTIVITY	PAGE(S)
18/05	Read and follow 'Finding the Maxima and Minima' on page 139 – 141	6 number 1	141
19/05		6 number 2	142
20/05		6 number 3	142
21/05		Revise formulate and Maxima and Minima. See Annexure A on page 3 – 4 of this document	139 – 142
22/05	Write a test	Use 2017 Supp. QP attached as Annexure B on page 5 of this document.	

**REMEMBER, PRACTICE MAKES PERFECT!**

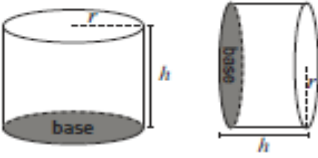

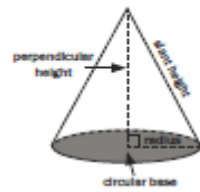

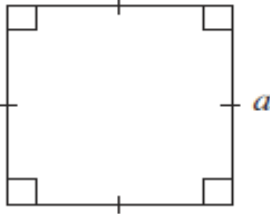

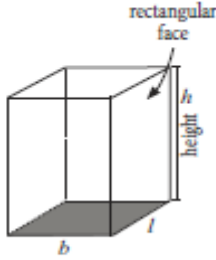

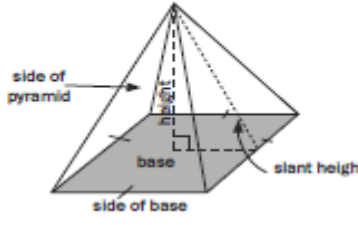

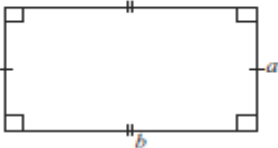

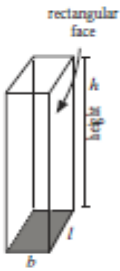

**SO, PRACTICE, PRACTICE AND PRACTICE!**

building blocks for growth.

# ANNEXURE A

2-D shapes	3-D shapes Right prisms	3-D shapes Where the base is a polygon and the sides meet at one point, the apex.
<p><b>Area &amp; Perimeter</b> (The distance around the outside)</p>	<p><b>V = Area of base × ⊥ height</b> &amp; <b>Surface area = the sum of the areas of the flat shapes</b></p>	<p><math>V = \frac{1}{3} \text{Area of base} \times \perp \text{Height}</math> <math>= \frac{1}{3} A \times H</math> Where <math>H</math> is the perpendicular height &amp; Surface area = Area of base + <math>\frac{1}{2} ph</math> where <math>p</math> is the perimeter of the base and <math>h</math> the slant height</p>
<p><b>1. Circle</b></p>  <p><math>A = \pi r^2</math> Circumference = <math>2\pi r</math> Circumference = <math>2\pi r</math></p>	<p><b>1. Right cylinders</b></p>  <p><math>V = \pi r^2 \times h</math> Surface area = <math>2\pi r^2 + 2\pi rh</math></p>	<p><b>1. Cones</b></p>  <p><math>V = \frac{1}{3} \pi r^2 \times H</math> Surface area = <math>\pi r^2 + \frac{1}{2} (2\pi r \times h)</math> <math>= \pi r^2 + \pi rh</math></p>
<p><b>2. Square</b></p>  <p><math>A = \text{length} \times \text{length} = a^2</math> Perimeter = <math>4a</math></p>	<p><b>2. Square prism</b></p>  <p>Note: <math>l = b = h = a</math> <math>V = a \times a \times a = a^3</math> Surface area = <math>6a^2</math></p>	<p><b>2. Square base pyramid</b></p>  <p><math>V = \frac{1}{3} a^2 \times H</math> Surface area = area of square + <math>4 \times \text{area of triangle}</math> <math>= a^2 + 4 \left( \frac{1}{2} \cdot a \cdot h \right)</math> <math>= a^2 + 2ah</math></p>
<p><b>3. Rectangle</b></p>  <p>Area: <math>A = \text{length} \times \text{breadth} = ab</math> Perimeter = <math>2a + 2b</math></p>	<p><b>3. Rectangular prism</b></p>  <p><math>V = l \times b \times h</math> Surface area = <math>2lb + 2lh + 2bh</math></p>	<p>The <b>slant height</b> runs from the middle of the edge of the base to the apex.</p> <p>We calculate the slant heights using the perpendicular height and the dimensions of the base by using the Theorem of Pythagoras.</p>

building blocks for growth.

*Ikamva eliqaqambileyo!*

<p><b>4a. Right-angled triangle</b></p>  <p>Area:  <math>A = \frac{1}{2} \times \text{base} \times \text{height}</math>  <math>= \frac{1}{2} \times b \times a</math>          Perimeter = <math>a + b + c</math></p> <p><b>4b. Triangle</b></p>  <p>Area:  <math>A = \frac{1}{2} \times \text{base} \times \perp \text{ height}</math>  <math>= \frac{1}{2} \times b \times h</math>          Perimeter = <math>a + b + c</math></p>	<p><b>4. Triangular prism</b></p>  <p><math>V = \left(\frac{1}{2} \times b \times h\right) \times H</math>          Surface area of triangular prism  <math>= 2 \times \text{area of triangle}</math>  <math>+ (\text{sum of areas of 3 rectangles})</math></p>	<p><b>4. Triangular base pyramid</b></p>  <p><math>V = \frac{1}{3} \text{ area of base triangular} \times H</math>          Surface area = area of base triangular  <math>+ (\text{sum of areas of 3 triangles})</math></p>
<p><b>2-D shapes</b></p>	<p><b>3-D shapes</b></p>	<p><b>CONVERSIONS</b></p>
<p><b>1. Circle</b></p>  <p><math>A = \pi r^2</math>          Circumference = <math>2\pi r</math></p>	<p><b>1. Spheres</b></p>  <p><math>V = \frac{4}{3} \pi r^3</math>          Surface area = <math>4\pi r^2</math></p>	<p>1 millilitre = <math>1\text{cm}^3</math>    <math>1 \text{ m}^3 = 1000 \text{ litres}</math></p>

building blocks for growth.

**ANNEXURE B**

**2017 SUPP MATH P1 NSC**

**QUESTION 7**

7.1 Determine  $f'(x)$  from first principles if  $f(x) = x^2 - 5$ . (5)

7.2 Determine the derivative of:  $g(x) = 5x^2 - \frac{2x}{x^3}$  (3)

7.3 Given:  $h(x) = ax^2, x > 0$ .  
Determine the value of  $a$  if it is given that  $h^{-1}(8) = h'(4)$ . (6)  
[14]

**QUESTION 8**

Given:  $f(x) = 2x^3 - 5x^2 + 4x$

8.1 Calculate the coordinates of the turning points of the graph of  $f$ . (5)

8.2 Prove that the equation  $2x^3 - 5x^2 + 4x = 0$  has only one real root. (3)

8.3 Sketch the graph of  $f$ , clearly indicating the intercepts with the axes and the turning points. (3)

8.4 For which values of  $x$  will the graph of  $f$  be concave up? (3)  
[14]

**QUESTION 9**

A piece of wire 6 metres long is cut into two pieces. One piece,  $x$  metres long, is bent to form a square ABCD. The other piece is bent into a U-shape so that it forms a rectangle BEFC when placed next to the square, as shown in the diagram below.

Calculate the value of  $x$  for which the sum of the areas enclosed by the wire will be a maximum. (7)
