QUESTION 2

Give a definition of the following terms:

- a) **Throttling:** **Bandwidth throttling** is the intentional slowing or speeding of an **internet** service by an **Internet** service provider (ISP). It is a reactive measure employed in communication networks to regulate network traffic and minimize **bandwidth** congestion
- b) **Shaping Internet access:** With a **Shaped internet** connection, priority is given to services like email, **internet** browsing and FTP. Other **internet** protocols like file sharing and online gaming receive a lower priority, and will run slower at times when the network is busy. Unshaped **internet** access treats all protocols the same.
